## **Consultative workshop held at Spt**

**IMPHAL, Jun 28:** A one-day district level consultative workshop for Manipur State Action Plan on Climate Change was held today at SDWA Hall, Senapati district headquarters which was jointly organised by the Senapati district Students' Association and Directorate of Environment.

Speaking at the occasion, DC of Senapati, PK Jha said the issue and challenge of environment protection and climate change could not be countered by just organising awareness programme.

He said it is very unfortunate that the works to be done after the conclusion of the seminar or awareness programme were forgotten while adding that it would be meaningful when the people who participated in the programme work closely with the locals at the field. PK Jha encouraged the gatherings to organise such programme more frequently and get closer to the reality.

The programme was attended by Sp of the district, Puspanjali, Dr Brajakumar of the State Environment department, and representatives of NPO and various Village Authorities' members.
